

Pin Grip CP-150N

Features

- Designed to grip wire-shaped samples up to 3.2 mm diameter.
- Lightweight and small grip, fitting for tensile or compression tests of lower measuring range in a limited space.

Note

- Particular materials and shape can not be used.
- All information is subject to change without prior notice.

Applications

- Tensile measurement for material of fine diameter.
- Suitable for penetrating test gripping a cylindrical material with appropriate diameter.

Specifications

Model	CP-150N
Capacity	150 N (Tension/Compression)
Sample diameter	0 - 3.2 mm Ø
Weight	approx. 22 grams including a collet chuck
Accessories	two collets 0 - 1.7 / 2.3 - 2.7 mm Ø 1.7 - 2.3 / 2.7 - 3.2 Ø
