

## Peeling Attachments GT-10, GT-20

Optimal attachment to measure the peeling or shearing force of IC chips

### Feature

- Suitable for low capacity measurement in narrow space due to compact and light weight design.
- GT-10 for tension testing and GT-20 for compression testing.

**Application**

- The peeling attachment is installed on the a force gauge for peeling or shearing test of electronic components.

**Note**

- Combining with a test stand, more stable measuring becomes possible.
- All information is subject to change without prior notice.

**Specifications**

	GT-10	GT-20
Model	Tension	Compression
Capacity	500 N	
Mounting screw	M6	
Dimension	115 x 11.3 (WxØ)	
Weight	34 g
