

Flip Cap opening force test hook HFC-50N

Feature

- Designed for opening force test of plastic made flip caps.
- Easy to adjust to the sample thanks to the moveable hook.

Applications

- For mounting the sample on the test stand, the CCJ cap clamping device and the X axes sliding stage XST-500N are recommended.

Note

- Combining with a test stand, more stable measuring becomes possible.
- All information is subject to change without prior notice.
- Not suitable for all materials and shapes

Specifications

	HFC-50N
Capacity	50 N
Weight	15 g
Mounting screw	M6
